

CYBER RFID LOCKER LOCK

Enhance your locker room experience

Be-Tech Cyber RFID locker lock provides high security and comfort for locker and cabinet using proximity RFID carrier (RFID keycards, wristband, keyfobs, etc.) instead of uncomfortable mechanical keys that require expensive maintenance.

The Cyber RFID locker lock will turn your standard locker room into an exceptional experience. Be-Tech's solutions provide a new level of security for both shared and assigned use lockers. Convenient for both user and management, with the industry-leading technology, elegant design and fashionable looks, Cyber RFID locker lock will be suitable for every style of locker room.

Be-Tech Cyber RFID locker lock is the best solution for:

- Spa/Fitness centers
- Resorts
- Golf clubs
- Sauna
- Sport and gym centers

BENEFITS:

- **RFID contactless operated:** locking and unlocking of the locker is simply by bringing the RFID carrier near the reader.
- **Autonomous system:** no need for cabling, standalone and battery operated.
- **Shared Use/Assigned Use mode is optional for locker assignment:**
 - Shared use:** the user can select any free locker. Once occupied, the locker can only be opened by that specific card. Even though the card is not locker specific, it can only be used in one locker at a time.
 - Assigned use:** the user can open the same number of locker as guest room number; it can only be used in the specific locker while guest keycard still valid throughout the guest's stay.
- **Master keys:** available to create master cards, to manage all lockers in the property.
- **Tamper indicator:** buzzer alarm will on and last one minute if locks are being tampered or not close properly.
- **Occupied Notice LED:** blue notice LED will blink to indicate occupation once locker has been locked (for Shared Use mode).
- **Compatible with Be-Tech RFID hotel locking system:** Cyber RFID locker lock is fully compatible with Be-Tech RFID hotel locking systems.

HOW IT WORKS

The hotel can customize access to the locker when using RFID technology. Keycards can either be activated by default, when checking in a guest, or a later time if needed.

Be-Tech RFID locker lock provides two different working mode for owner choose. Owner can select whether the locker should be work on Shared Use mode upon free locker self-selection or if it should be work on Assigned Use mode upon check-in same room-locker number.

If owner select locker works on Shared Use mode, an RFID key prepared for a locker will be accepted by any vacant locker. Only the RFID key used to lock, or a master RFID key, can open the locker once is has been locked. The lockers are left open (vacant) after use. An RFID locker key has not time limit and is therefore valid throughout the guest's stay.

When a locker is being locked using a guest RFID key, it writes information back to the RFID key. This means that this specific RFID key cannot operate any other locker until the first one has unlocked. In other word, one RFID key can only operate one locker at a time, avoiding multiple lockers being locked by the same key.

If owner select locker works on Assigned Use mode, the RFID key prepared for a locker will be only accepted by same number of locker as guest room number. Only the right number RFID key, or a master RFID key, can open the locker. The lockers are closed at any time. The RFID locker key has no time limit and is therefore valid still throughout the guest's stay.

When owner select locker works on Assigned Use mode, is has to set up same system password and guest room number as hotel RFID locking system before using. This means that the RFID key can only operate the specific locker. Convenient for hotel guests secure their property.

Technical Specification

Description	Contactless electronic lock for lockers
Power source	4 AA batteries - 1,5V
Life cycle	15,000 cycles / 1 year
RFID frequency	13.56MHz
Reading distance	10 to 25 mm (0.39 to 0.98 In)
Temperature range	-20 / 55 C (-4 / 131 F)
Dimension(H x W x D)	Front body: 114 x 37 x 16 mm (4.48 x 1.46 x 0.63 In) Back body: 133 x 66 x 27.5 mm (5.24 x 2.6 x 1.08 In)
Installation thickness range	12 to 22 mm (0.47 to 0.87 In)
Color option	Silver / Gold
Weight	200 gr (7.05 oz)
